St. Louis, MO 63108

Dear June,

Thank you for your donation to the Alvin J. Siteman Cancer Center for the Celebrate Tennis 2017 event. We greatly appreciate your support.

Siteman Cancer Center is an international leader in moving scientific discovery into clinical practice with new methods and interventions to better diagnose, treat and prevent cancer. Your contribution truly makes an impact on the lives of our patients, their families and the greater community.

Generous gifts from supporters like you allow us to achieve significant milestones in our research programs, including:

- Offering more than 500 clinical trials annually, with more than 50% of newly diagnosed patients enrolled in therapeutic trials, and 22% enrolled in therapeutic interventional trials.
- Conducting the first human clinical trial of personalized vaccines for advanced melanoma patients, with additional trials planned for melanoma, brain and breast cancer.
- Installing two new technologies: (1) a proton therapy facility that is the first to use a compact, single-room system to deliver treatment; and (2) the world's first MRI-guided radiation therapy system.

Our goal is to find cures for all types of cancers, and with the support of individuals like you, we hope to fulfill that dream. Thank you for believing in us and sharing our vision of a future without cancer.

Warmest regards,

Muriel Carp
Director of Community Relations and Events
