

Washington University in St. Louis

BROWN SCHOOL

To: BJC Healthcare.

Thank you for affording me this rare opportunity to pursue my dreams from a leading Institution of Public Health with leading faculty. I graduated with an MD in Cuba and whilst working at the biggest hospital in Zimbabwe, I realized that I could not reach out to as many people as I would have wanted to due to high rates of infectious diseases especially HIV/AIDS. Key affected populations are overlooked due to illegal nature of sex work and homosexuality, leaving them out of programs.

Coursework such as Public Health Policy has given me an insight to the importance of having sound policies on the part of decision-makers so as to have better healthcare outcomes. Moreover, as a Master's Research Fellow in Global Health and Nutrition, I am getting hands on experience in research at international level.

Thus your prestigious scholarship will go a long way in helping me get the relevant skills I will need as I work towards eradication of infectious diseases especially HIV/AIDS. An MPH coupled with a medical residency in Internal Medicine will help me attain the necessary knowledge to succeed at the task at hand.

Again, thank you very much!

Best

Clive Mutsonza, MD
MPH candidate
